- Thank you to my parents, Mr Ken Kan, Clevered, Mentors, Mis Smita, all of my peers, snap and ecraft to learn site.

About Me..

- Hello My name is Alivia Freya Zahra, and I am 10 years old. I am in Year / Grade 6. I live in Brighton UK and go to Brighton College.

About My Internship with Clevered..

I have really been enjoying the fun lessons so far, I have also really enjoyed doing all of the homework assignments. If you counted this as an assignment it would be my favourite one but if not, then it would be the Week 2 Make an AI app

I have earned 3 rockstar badges with clevered.

About App..

- The project which I chose is the 'Safety App' because I want to be a Doctor when i grow up and i also touch my face a lot so i can test it on myself. Covid 19 has changed the way we live so, I wanted to help. This app will help to calm down the spread of this Virus. The Project is basically to make an app that will notify people when they touch their face.

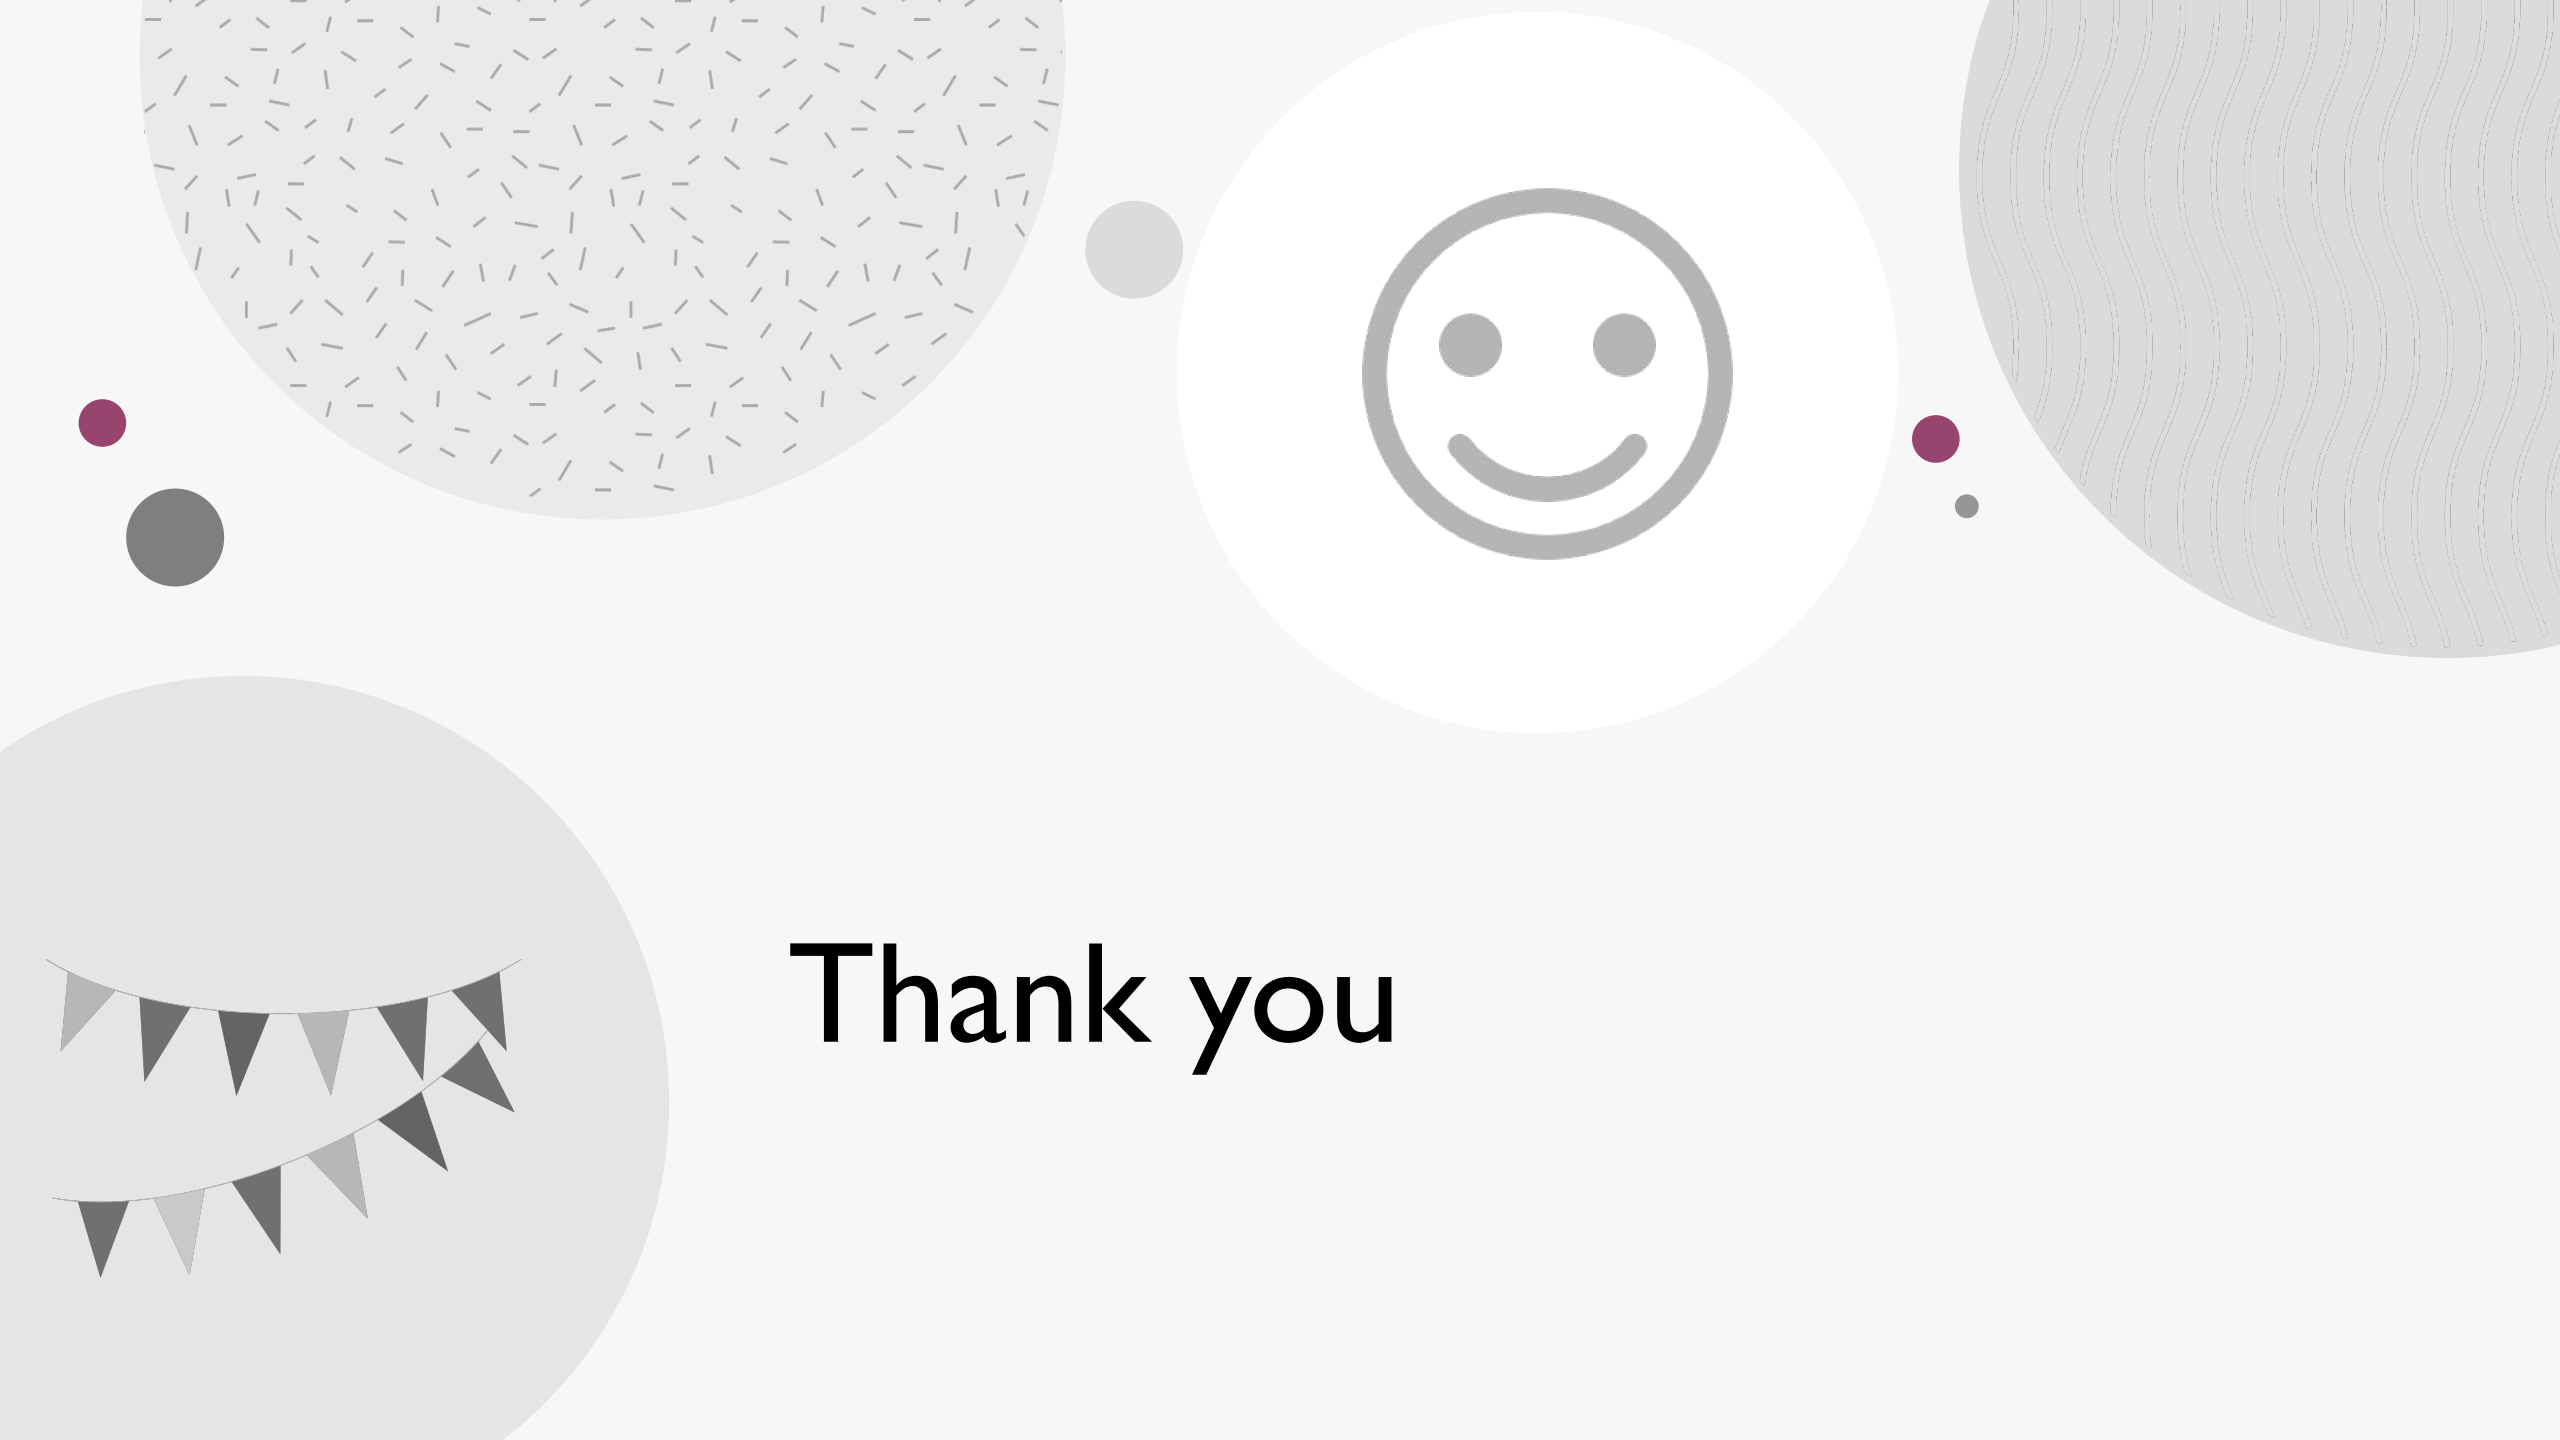

How do I use the App?

Please allow camera  and then let the app begin its job.

The background is a dark, semi-transparent overlay on a photograph of a white computer keyboard and a black stethoscope. The stethoscope is positioned diagonally across the lower right. Several white and grey circles of varying sizes are scattered across the image, including a large white circle on the left and a small orange circle near the top right.

Contact Person

- Please reach out to Alivia at aliviafzahra@gmail.com for any concerns/ suggestions on the App

Thank you
